

The Road to Good Teeth

Home Care

Teeth should be brushed regularly, at least twice daily.

A small brush should be used.

If you cannot get tooth powder or paste, baking soda is good.

Brush your teeth the way they grow.

Clean teeth are necessary to good appearance and **MAY** help to prevent decay.

Dental Care

Prevent necessity of big repairs by early and regular visits to your dentist.

There is never a hole in a tooth too small to fill.

Two years of age is not too young to start dental care.

Small defects are cheaper, easier, and less painful to correct.

MAKE THE LITTLE HOLE—NO HOLE!

Proper Foods

GOOD NUTRITION IS NECESSARY TO GOOD HEALTH

Watch your daily needs and consult your physician for dietary information relating to your specific problems.

The Time Table of Teeth

Serving THE MOTHERS of NEW HAMPSHIRE

NOT EFFECTIVE AFTER 21 YEARS

BABY TEETH

NO.	TOOTH	ARRIVE #	DEPART †
		Months	Years
1	Lower Central Incisor	7-8	6-7
2	Upper Central Incisor	9-10	7-8
3	Upper Lateral Incisor	11-12	8
4	Lower Lateral Incisor	12-13	7-8
5	Upper First Molars	14-15	10-11
6	Lower First Molars	15-16	10-11
7	Upper and Lower Cuspids	18-19	12
8	Upper and Lower Sec- ond Molars	26-27	11-12

Time of Arrival and Departure subject to change without notice in each individual.

The above is the usual time, but is subject to influence of general growth.

This gives the expected date of arrival—all of these teeth **started before** Baby was born.*
